

MARKETING, BRAND & CONSUMER INSIGHT

Murphy Tang

I start from the consumer: who they are, what they value, and what makes them lean in or walk away. Then I turn that into positioning, content and campaigns, and check the numbers afterward.

VIEWS FROM 5 KOLS

STEP	WHAT I DID
Insight	Profiled the target audience's lifestyle preferences with Google Search and Meltwater social listening.
Content	Rewrote copy and reworked the feed layout around those insights. Instagram followers then grew 70% month over month.
Brand assets	Turned Fashion Future and WGSN research into the Brand Book and Look Book, built in Illustrator and InDesign.
Expansion	Helped coordinate collaboration talks with Macy's and Nordstrom and lined up 5 U.S.-based KOL partnerships.

HANGZHOU DAYU NETWORK TECHNOLOGY · SEPT 2025 – MAY 2026

Marketing & Resource Integration Intern

Researched segmented user behavior and product performance to guide **pricing, promotion and bundling** on multiple platforms. Analyzed multi-channel user and sales data to spot demand trends, which helped improve **campaign targeting efficiency by 15%**.

MOOSE KNUCKLES · SHANGHAI · JUN – AUG 2025

Data Analyst Intern, Merchandise

Built weekly Excel sales dashboards that supported a **2% YoY gain in Q3 sell-through**. Worked with the Canadian HQ and the Korea team on APAC-exclusive styles.

HANRO · NEW YORK · OCT 2024 – JAN 2025

Sales Intern

Gave product introductions and one-on-one styling advice on the shop floor. Converted **90%+ of customers** I served and contributed to about **\$3,000 in daily sales**.

Pandora × Apple Watch Bands: a launch marketing plan

Brief: expand Pandora, the global leader in affordable-luxury jewelry, into wearable tech with a line of Pandora-branded Apple Watch bands. The goal was to **win Millennial and Gen Z shoppers** without losing Pandora's loyal core customers.

€31B

GLOBAL LUXURY JEWELRY MARKET, 2024

\$4.6B

PANDORA 2024 REVENUE

12 mo

LAUNCH-TO-SCALE ROADMAP

SITUATION ANALYSIS

Strengths	Global presence; end-to-end control of design and production; repositioned around affordability and personalization
Weaknesses	Too dependent on jewelry; weak communication strategy
Opportunities	Omnichannel shopping is growing, and so is demand for personal, meaningful accessories and wearable tech
Threats	LVMH, Richemont and Signet (Kay, Zales) competing; economic swings

TARGETING: A CONCENTRATED STRATEGY

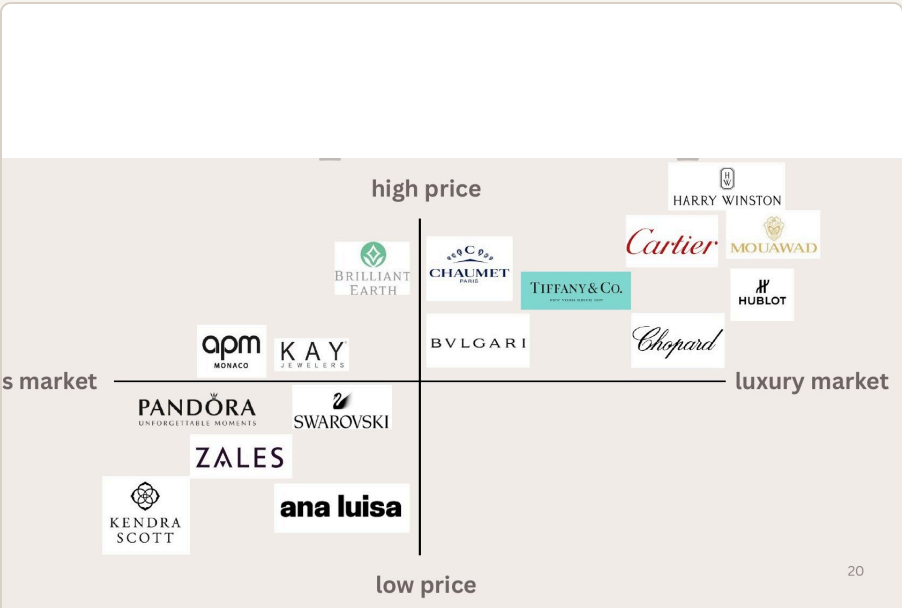

Focus spend on one high-potential overlap: **people who love both Pandora and Apple**. They are 25–39, middle-class, based in the U.S., UK, Australia, Italy, China and France, and they buy jewelry to tell a personal story, as a gift or a self-reward. Narrow targeting gives more efficient spend and a better chance of conversion, and it gives existing fans a new, wearable reason to buy.

PERSONA

26, art director, Brooklyn, ~\$80K

- Owns an iPhone 15, Apple Watch S9 and MacBook Air
- Active on Instagram, Pinterest and TikTok; goes to Pilates and spin classes
- Swaps Watch bands to match her outfit
- Buys brands that carry emotional and aesthetic value

Perceptual map (price × mass-to-luxury). Pandora holds the affordable-mass quadrant. The Watch band moves it toward "value luxury" without competing head-on with Cartier or Tiffany.

PROJECT 01 · MARKETING MIX

"Spring into the Future": product, price & place

PRODUCT

A mood board that combines Pandora charms with Apple's product language. The color story, "Spring into the Future," pairs *Pandora Pink* with *Apple Chrome* and adds *iPod Nano Blue*, *Solar Flare*, *Cosmic Blush* and *Techno Tangerine*. Bands come in charm-link, bangle and silicone styles, so each one can be customized with charms.

PRICE: A THREE-TIER LADDER

TIER	RANGE	ROLE
Silicone	\$15	Entry point for Gen Z
Sterling / plated	\$128 – \$305	Core, gift-able line
Watch + band bundle	\$915 – \$1,054	Halo, Apple co-sell

Silver, gold and rose-gold finishes; 42 and 46 mm cases.

PLACE: A PHASED ROLLOUT

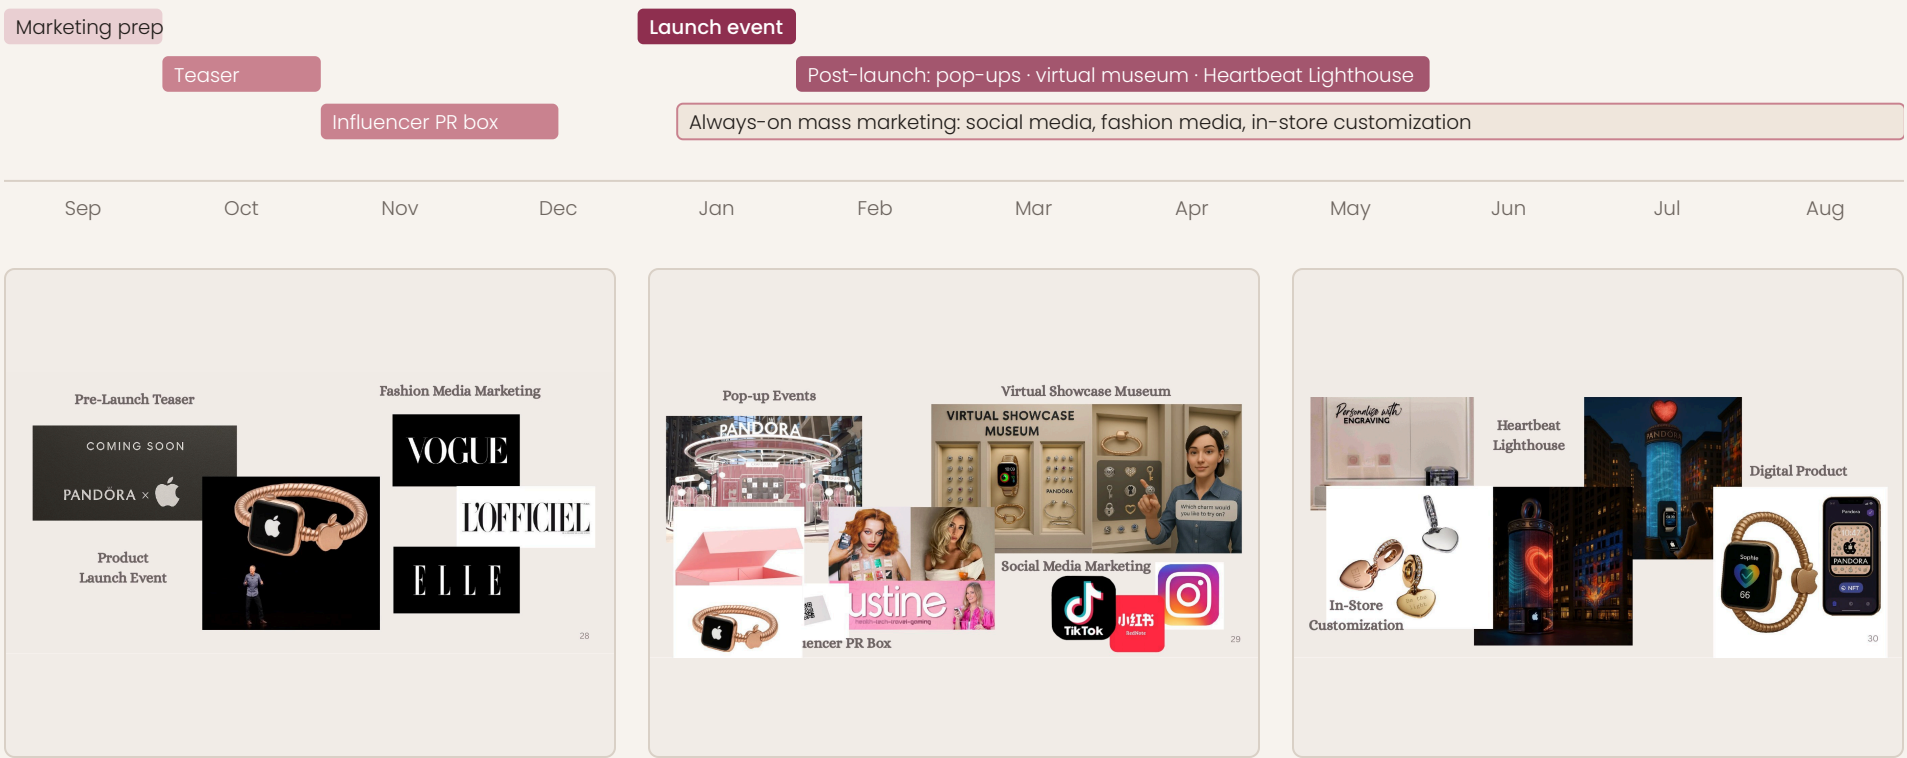

Phase 1 · months 1–6: Apple flagships, Pandora flagships and select boutiques, both brands' websites, and pop-ups in New York, Paris, Tokyo, Dubai and Beijing.

Phase 2 · month 7 on: all Pandora and Apple stores, authorized retailers, and luxury e-commerce such as Net-a-Porter.

Scarcity first, scale later. Limited early access builds buzz before wide distribution.

PROJECT 01 · PROMOTION STRATEGY

A 12-month launch calendar built on the funnel

1 · AWARENESS

A "Coming soon: Pandora × Apple" teaser, a keynote-style launch event, and placements in *Vogue*, *L'Officiel* and *Elle* to reach both fashion and tech audiences.

2 · CONSIDERATION

Influencer PR boxes, city pop-ups and a **Virtual Showcase Museum** where shoppers try bands on digitally. Social content runs on Instagram, TikTok and Xiaohongshu to cover the U.S. and China.

3 · CONVERSION

In-store engraving and charm customization, a digital companion product, and the **"Heartbeat Lighthouse"** installation, which lights up with the wearer's heart rate. Each one turns interest into a purchase people can share.

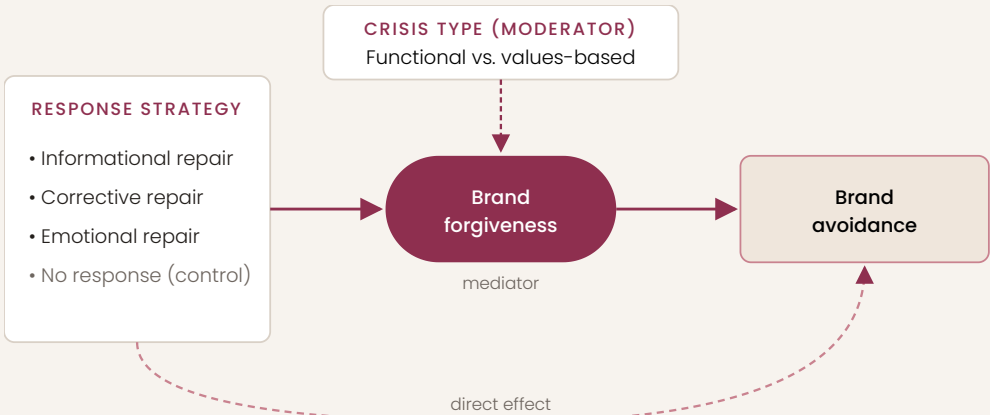

Takeaway: Pandora's customization story and Apple's daily-use ecosystem each fill the other's gap. That turns a one-time jewelry gift into an accessory people wear and restyle every day.

PROJECT 02 · UNDERGRADUATE THESIS · ADVISOR: XIAO ZENGRUI · 2026

When a fashion brand is in crisis, which response wins customers back?

News of a brand scandal now spreads in hours. I studied "justifiable" PR crises, where blame is still unclear, and tested which response strategies make consumers forgive a brand and which ones push them to avoid it.

RESEARCH DESIGN · 4 × 2 SCENARIO EXPERIMENT + SURVEY

METHOD

- **Literature review** of crisis-PR, brand forgiveness and brand avoidance studies in English and Chinese.
- **Hypotheses** H1-H5: how each strategy affects avoidance and forgiveness, the mediating role of forgiveness, and moderation by crisis type.
- **Stimuli**: I wrote realistic apparel-brand crisis scenarios (product-function failure vs. cultural/values controversy) and brand statements for each strategy.
- **Fieldwork**: recruited online through WeChat with screening questions; mostly young, female fashion shoppers, who match the category.
- **Analysis**: reliability and validity (KMO, Bartlett $\chi^2 = 1834.27$, $p < .001$), Levene's test, independent-samples t-tests, two-way ANOVA, regression with controls, and mediation testing.

HYPOTHESES SUPPORTED

PROJECT 02 · FINDINGS

An apology alone backfires. Facts and fixes work.

MEAN SCORES BY RESPONSE STRATEGY (1-7, N = 99 PER GROUP)

Every strategy differs significantly from the no-response group (independent t-tests, all $p < .001$).

$\beta -0.81$

FORGIVENESS →
AVOIDANCE

66%

OF AVOIDANCE EXPLAINED
(ADJ. R^2)

$\eta^2 .77$

STRATEGY EFFECT ON
FORGIVENESS

WHAT THE DATA SAYS

- **Corrective and informational responses** raise forgiveness by about 2.2–2.4 points and cut avoidance by about 2 points compared with silence.
- **An emotional apology alone is worse than saying nothing:** consumers read it as "strategic" and not sincere.
- **Forgiveness is the mechanism.** Responses change behavior by changing how willing people are to forgive (cognition → emotion → behavior).
- **Match the response to the crisis.** Facts and fixes matter most in product-function crises. Values crises also need a credible stance.

For brand & social teams: don't rely on one template for every crisis. Lead with verifiable information and concrete corrective steps, and let empathy support that substance, not replace it.

PROJECT 03 · FIT FM 205 · FIVE WRITTEN CASE ANALYSES

Brand turnaround case studies

Each case used the same method: read the market at the time of the case, name the objectives and problems, apply two or three marketing frameworks, weigh three solutions across the 4Ps, and recommend one with a success metric.

NEIMAN MARCUS

Problem: a luxury department store that appealed to Baby Boomers while Millennials looked for value after the recession.

PROMOTION MIX

VALUE EQUATION

Rec: re-edit the brand assortment and widen the price range with quality affordable-luxury labels.

VEGAN FASHION BRAND

Problem: greenwashing accusations, closed stores and more competitors for a brand that relies on word of mouth.

4PS

SWOT

Rec: prove the sustainability claims with evidence and certification to build lasting loyalty.

UNIQLO, NORTH AMERICA

Problem: low brand awareness and store closures in the suburbs while competing with H&M and Zara.

PESTEL

PERCEPTUAL MAP

Rec: targeted Instagram and Facebook campaigns, the fastest and most stable way to build awareness.

VICTORIA'S SECRET

Problem: a brand image that fell out of step with inclusive, self-defined femininity; younger rivals gaining share.

BRAND IDENTITY PRISM

PERCEPTUAL MAP

Rec: an inclusive product line plus a real-customer social review campaign to reposition the brand.

ALEXANDER WANG

Problem: a reputational crisis handled with silence, which cost followers and consumer trust.

COMMUNICATIONS MODEL

CRISIS PR

Rec: reopen the channel with a clear explanation, then build PR capability and a public ethics code.

FRAMEWORK TOOLKIT USED ACROSS THE FIVE CASES			
4Ps / marketing mix checked every solution against product, price, place and promotion	SWOT & PESTEL internal and macro-environment scans at the time of the case	Perceptual mapping price × market positioning against named competitors	Brand identity prism physique, personality, culture, relationship, reflection, self-image
Communications model sender → message → channel → receiver → feedback	Value equation perceived benefit vs. price for a new generation of shoppers	Objective horizons each goal labeled short, medium or long term	Pros / cons & P&L impact revenue and profitability effect of each option

Thread: the crisis cases (Victoria's Secret, Alexander Wang) raised the question my thesis later tested with data: *which* kind of response actually rebuilds trust?

PROJECT 04 · FIT FASHION FORECASTING · FALL 2024

Fall 2025 forecast: "Travel Back to the '80s"

A cultural-moment forecast built on the final season of *Stranger Things* (2025). Digital-native Gen Z shoppers want authenticity, nostalgia and self-expression, and the show's 1980s setting gives that feeling a shared visual language.

CONSUMER THEMES

BELONGINGNESS

AGAINST THE FEAR

FREEDOM

SELF-IDENTITY

CHARMING

FORECAST DELIVERABLES

- **9-color palette** named after the story (Upside Down, Hawkins, Vecna, Eleven...) with Pantone matches
- **Textile palette:** plain weave, thermal knit, twill, leather, sequins, corduroy
- **Key items:** baggy jeans, leather coat, corduroy blazer, bowling bag, and the home look
- Sourced from WGSN, Fashion Snoops, Vogue Runway and street style

Why it matters for marketing: a forecast works as a creative brief. It gives merchandising, content and campaign teams one story to build around, months before the season.

PROJECT 05 · FIT · COLLABORATION CONCEPT & MISSION STATEMENT

"Horizontal Speed": Bottega Veneta × Puma

A co-branded capsule that combines Bottega Veneta's craft with Puma's athletic energy, in partnership with **WWF**. I wrote the brand story and mission, then carried it through mood, color, textile and flats.

BRAND STORY

Two signatures merge: Bottega's *intrecciato* weave and Puma's leaping cat. The image is a puma sprinting across an endless plain toward top speed. It stands for New York: ambitious and tough on the outside, warm underneath.

POSITIONING

Aesthetic	Metallic minimalism meets athleticwear; cool, low-saturation, lustrous tones
Product	Tailored, streamlined, wrinkle-resistant and skin-friendly fabrics that work across occasions
Purpose	Sustainability that fits WWF's mission, which gives the collab a reason to exist beyond hype
Audience	Urban professionals who want function, comfort and quiet luxury

PROJECT 06 · FIT FM 207 RETAIL STRATEGIES · SPRING 2025

Bath & Body Works: nostalgia, stores and the omnichannel gap

80%

OF SHOPPERS CHECK WEB/APP
BEFORE VISITING

33%

OF BOPIS PICKUPS ADD A PURCHASE

74%

OF SALES STILL IN STORES

6,000+

SKUS LAUNCHED EACH YEAR

5%

OF SALES FROM OVERSEAS

BRAND

Nostalgia is the core strategy: a favorite childhood scent brings back memories and builds a psychographic bond. The brand targets middle-class shoppers aged 15–60 who want more than drugstore quality at accessible prices. Stores are designed as the home of "Kate," a fictional founder.

LOYALTY & CHANNEL

My Bath & Body Works Rewards offers points, early access and birthday gifts. Stores handle **discovery** (you have to smell a fragrance) and e-commerce handles **replenishment**. 40% of sales come from shoppers who visit 7+ times a year.

RISKS & RECOMMENDATIONS

Heavy dependence on stores, a thin international presence, and Ulta and clean-beauty brands competing on price and sustainability. **Recommendations:** expand eco and wellness lines (eco sales grew 35% in 2023) and solve the "scent online" problem with richer digital fragrance storytelling.

HOW EACH CHANNEL DOES A DIFFERENT JOB IN THE JOURNEY

Let's talk about your next launch.
